2.5 Evaluation Process and Reforms

2.5.1 Mechanism of internal assessment is transparent and robust in terms of frequency and mode

Response:

A multitude of strategies are in place to align with the evaluation methods, and we remain steadfast in adhering meticulously to the evaluation norms and regulations set by JNTUGV University. Each department is allocated specific time slots to carry out descriptive assessments and online quizzes. We meticulously align with the academic schedule provided by the university to formulate internal exams and assignments that comprehensively cover the Course Outcomes (COs) while respecting the appropriate taxonomy levels. Our faculty takes great care to encompass a wide range of taxonomies within the assignment questions to offer a comprehensive evaluation.

In alignment with the university's guidelines, two Mid Examinations are organized for students during each semester. The calculation of Final Mid marks is structured as follows: (Best of (Mid-1/Mid-2) marks x 0.8 + Least of (Mid-1/Mid-2) marks x 0.2). Each faculty member takes on the role of crafting an evaluation scheme that meticulously guides the assessment of student answer scripts in accordance with the stipulated criteria. These answer scripts are then shared with students within the classroom setting, accompanied by an explicit explanation of the evaluation rubric. Any concerns or inconsistencies that arise are promptly addressed by instructors prior to submitting the students' performance records to the college examinations section.

Our evaluation process is intentionally designed to ensure a timely completion, with results promptly shared with the exam cell. Simultaneously, these results are also displayed on departmental notice boards, offering transparency and empowering students to engage proactively with their academic progress. In addition to these evaluative efforts, we remain dedicated to enriching students' knowledge through a series of guest lectures, seminars, and technical workshops that delve into contemporary trends. These sessions provide a unique

opportunity for students to engage with resource persons from esteemed educational institutions and industries, thereby enhancing their practical skills and expertise.

When assessing the outcomes of seminars, summer internships, and projects, the faculty coordinator orchestrates a schedule for student presentations, consulting with the Head of Department (HOD) to ensure alignment. Students are evaluated based on various parameters outlined by the respective coordinator. Similarly, for the evaluation of laboratory courses, an internal practical viva is meticulously administered by a dedicated faculty member upon the conclusion of the course.

Furthering our commitment to holistic development, events like the "CHAITANYAM" Tech-Fests serve as platforms to enhance student engagement and foster robust relationships with neighbouring institutions. Additionally, our students actively partake in socially impactful activities such as NSS and Swachh Bharat, which are subjected to evaluation based on the standards of their work culture. This multifaceted approach to evaluation, aligned with our commitment to academic excellence and student growth, lies at the core of our educational philosophy.
