She went on shedding some light on the key components of basic listening skills as attentiveness, silent listening, understanding and comprehension, nonverbal cues like using nonverbal signals such as eye contact, nodding, and facial expressions to indicate your engagement.

She added that other key components of listening are paraphrasing, empathy, feedback, asking clarifying questions, remembering information, reflective listening, encouraging the speaker. She further strongly advocated that mastering these fundamental skills can create a solid foundation for effective communication and better interpersonal relationships. Whether in personal or professional interactions these skills are essential for understanding, connecting with, and respecting others.
