Resource Person: Dr. Pavan Satish

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING A BASIC APPROACH

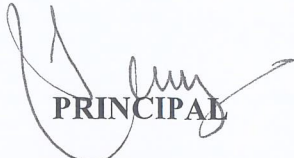

This is to inform you that Dr. Pavan Satish conducted a seminar on “Artificial Intelligence and Machine Learning” in Chaitanya Engineering College on 13-03-2023 for the students. He opened his talk by stating the fact that Artificial Intelligence and Machine Learning are the happening of the day and not of the future. He also went on to say that there was a common myth that AI and ML are only related to computer science and therefore the other disciplines do not have that importance. But he busted the myth by saying that AI and ML are almost equally relatable to all disciplines of engineering.

He emphasized the various advantages of AI and ML in various areas of human life. He highlighted some key advantages like automation, Improved Efficiency, Enhanced predictive analytics, Data insights, Natural Language Processing, Image, and video analysis, Fraud detection etc. He also emphasized the other advantages like Customer service, cost savings, continuous learning, Scalability, Decision Support, Environmental impact and so on. The audience has got a taste of what AI and ML can do for us and its advantages.

INTRODUCTION TO LINUX OS

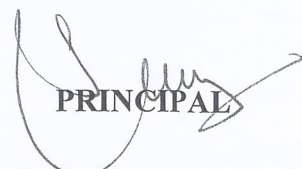

This is to inform you that Mr. A. Suresh conducted a one-day training session on "Introduction to Linux OS" in Chaitanya Engineering College on 07-02-2022 for the benefit of the students. He stated that Knowledge of Linux OS is highly essential as most of the machines in industrial contexts work on Linux OS. Therefore, he added that Linux OS is an open source and free and its customizability and security makes it an affordable and widely used OS. He went on to say that stability and reliability are good especially in server environments. It can run for extended periods without the need for frequent reboots or crashes, ensuring continuous availability of services.

Regarding the compatibility he said that Linux supports a wide range of hardware platforms and architectures, making it suitable for both older and newer hardware. It's also compatible with various file systems. And coming to multitasking and multithreading he emphasized that Linux provides robust support for multitasking and multithreading, allowing users to run multiple applications simultaneously and efficiently utilize multi-core processors. Regarding the community and support he says that Linux community is extensive and active. You can find support, documentation, and forums online, making it easy to troubleshoot issues and seek assistance. Overall, it was an informative session with lots of take-home information.

INTRODUCTION TO LATEX SOFTWARE FOR WRITING SCIENTIFIC ARTICLES

This is to inform you that Mr. N. Vasanth has conducted a one-day skill development session on "Introduction to LATEX Software for writing scientific articles" in Chaitanya Engineering College on 14-11-2020 for the benefit of the students. He said that LaTeX is a popular typesetting system used for writing scientific articles, research papers, theses, and other documents, especially in the fields of mathematics, computer science, physics, and engineering. He explained various LATEX software options one can use for writing scientific articles.

He said that TeX Live provides a wide range of packages and tools for scientific writing. Also, he explained about MiKTeX which is a popular, easy-to-install distribution of LaTeX for Windows. It automatically downloads and installs missing packages as you use them, making it user-friendly for beginners. He laid special emphasis on Scientific Word and Scientific Workplace which are commercial LaTeX-based word processors that offer advanced scientific notation and equation editing tools. He concluded that LATEX is a much-desired software in writing scientific articles which reduces the writing time needed for a conventional word processor.

ACTIVITY REPORT

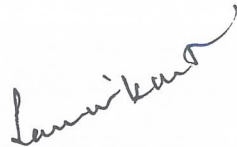

Name of the Activity: Python Programming
Date: 19-08-2019
Coordinator Name: Mr. P. Lakshmikanth
Time: 10AM
Venue: Seminar Hall, Visveswararaya Block
No. Of Participants: 83
Resource Person: Mr. K. Jeevan

PYTHON PROGRAMMING

This is to inform you that Mr. K. Jeevan has conducted a one-day seminar on “Python programming” in Chaitanya Engineering College on 19-08-2019 for the students. Mr. Jeevan has shared insights on the language and its uses for the engineering background students. He strongly advocated the use of python in engineering disciplines by citing examples from various engineering branches, be it computer science to mechanical. He then moved on to its various applications in the tech industry, including data science, web development, and automation. He emphasized the simplicity and flexibility of Python, noting that it can be used for everything from small scripts to large-scale projects.

He demonstrated how portable the python code is by citing simply written codes in python, which are otherwise lengthy. He also touched upon the importance of good coding practices, such as commenting and version control. The session was informative and engaging and left the audience with a newfound appreciation for the power of Python programming.

MASTERING BASIC EXCEL SKILLS

This is to inform you that Mr. M. Venkatesh has conducted a skill enhancement program on “Mastering Basic Excel Skills” in Chaitanya Engineering College on 03-09-2018 for the students. He stated that mastering basic excel skills is an asset for many aspects of work and personal life. He went on to emphasize that excel is a versatile spreadsheet program that can help you manage data, perform calculations, and create various types of documents. He has taken meticulous care in explaining the sample excel sheet, the ribbons, and various other functions in an elaborate manner.

He explained each function which can be easily grasped by the audience with little computer exposure. The various steps, according to him, that need to be taken care for easy way to master excel skills are understanding the interface, entering basic data, navigating through worksheets, formatting cells, understanding basic formulas and functions, call references, autofill and autosome, Data sorting and filtering, charts and graphs, Conditional formatting are the few. He also went on to add some others like headers and footers, printing and page setup, Data Protection, Keyboard shortcuts etc. Finally, he stressed the need for practicing regularly and graciously asked the audience to master excel skills.
